#### MEMORANDUM

**To:** Mayor and Council Members

From: Charles M. Duggan, Jr., City Manager

**Date:** August 23, 2011

**Subject:** FY2011-FY2012 Mid-Biennium Review and Budget Adjustment Proposal

The Mid-Biennium Review and budget adjustment process provides the opportunity to recognize significant, material, fiscal events having occurred since the adoption of the current biennial budget and to plan for events that we anticipate will occur before the biennium concludes. During the March 30, 2011 Revenue Review session we discussed the inadequacy of projected revenues to fully fund the objectives of the Council and the priorities of our residents. Therefore, for us to maintain the current level of services, to continue to promote economic development efforts, to construct and maintain quality infrastructure, and to fund the needs of our local school system, additional revenues were necessary. As a result of that discussion the City Council approved an increase of 1% in the City's sales and use tax rate.

The first table below is from the March Revenue Review and illustrates the projected decline of the City's General Fund balance had there been no tax increase and assuming that current trends and levels of service would continue. The table does not reflect that under this scenario there were no additional funds available for infrastructure projects, street resurfacing, capital equipment replacement, economic development initiatives, or the City school system.

Please note that significant Ending Fund Balance drawdowns would have occurred and that our projected Unreserved, Undesignated portion of the Ending Fund Balance would have been negative in 2016.

Conversely, the table below illustrates the proposed mid-biennium budget as outlined in this document which revises our projected revenues, expenditures, other financing uses and Ending Fund Balance. These changes will be discussed in more depth later in this message. Of significant note is the continued draw down of the Ending Fund Balance in the current fiscal year due to the need to purchase a significant amount of capital equipment as a result of delaying the replacement of aged machinery for the past several years. As noted, with the increased revenues projected, draw down of the Ending Fund Balance is eliminated by FY13 and the Fund Balance is projected to increase by nearly one million dollars in FY15 and two million dollars in FY16.

#### **Expenditure Adjustments Proposed for Mid-Biennium**

In keeping with the Council priorities, a number of expenditure adjustments are made possible by the increased sales tax revenues.

**School Funding:** School funding continues to be identified as a priority by the Council; much of the discussion during the Revenue Review centered on the long-term needs of the school system. While a clear plan for many of those capital and operating needs for the future is still being developed, an immediate need to construct a new elementary school and fund general school operations under an environment of declining state revenues clearly exists. In recognition of this, the proposed adjustment for FY2012 includes an additional appropriation of \$2,500,000, bringing the total provided to Auburn City Schools by the General Fund to \$9,550,759. This is considered a temporary measure to ensure their identified immediate needs are met; City staff will continue to work with school administration officials to develop a long-term funding plan. This discussion is expected to be a major component in developing the FY2013-FY2014 Biennial Budget proposal.

**Economic Development:** The Council has identified continued aggressive economic development as a long-term goal in order to provide jobs and expand the City's revenue base. The success of our current and past efforts have helped keep the City's unemployment rate below that of the state and nation, as well as keep the City's revenue outlook relatively stable. In order to continue to provide the level of investment required to sustain the growing activities of our Industrial Development Board, however, staff identified several areas that were underfunded or unfunded during the Revenue Review. The approval of the sales tax increase will provide the necessary resources to ensure these activities are funded in FY2012 and beyond.

- The completion of Auburn Technology Park West, previously delayed until FY2013 due to funding constraints, has been accelerated. Debt service for a \$5.0M General Obligation Warrant has been included in the proposed adjustments for FY2012. Construction of Riley Street and other park infrastructure is currently underway.
- An additional \$174,920 in funding for the Industrial Development Board is included to provide for continued recruitment efforts and board operations.
- Total funding of \$25,000, an additional \$11,500, for the Auburn Chamber of Commerce is included.

Also included in the long-term General Fund projection is approximately \$1.7M in annual debt service for the purchase of additional land for a future technology park and the extension of West Veterans Parkway; these expenditures are projected to occur in FY2015 as other General Fund debt is retired.

Maintaining City Services: While improvements in efficiencies and employee commitment to the responsible use of resources have allowed departmental operations to continue uninterrupted, most departmental operations have been roughly level-funded since FY2007. Many of the line-item budget reductions have been targeted towards temporary personnel and overtime expenditures to minimize the impact on our regular employees and front-line services; departments with higher concentrations of these types of expenditures would have to implement significant service reductions in FY2012. Services would be reduced primarily

in areas such as right-of-way maintenance, maintenance of parks, staffing of athletic and recreation events, and in areas requiring police overtime such as downtown patrols. The planned reductions in these areas as well as reductions in commodities budgets would greatly impact the provision of public safety services, as adequate Police and Fire protection rely to a high degree on limited commodities budgets (fuel, vehicle parts) and overtime.

In order to prevent significant reductions in the level of services provide to City residents, departmental operating budgets in six of our twelve departments are proposed to be adjusted by a total of \$1,751,708. Of this amount, approximately \$256,000 is comprised of payments to area law enforcement agencies for Auburn University game day services that were previously paid directly by the University; these costs are fully reimbursed.

Capital Investment: As the City developed the past two biennial budgets a key component of management's strategy was to rely on reserves to absorb the impact of the recession in order to reduce any potential decreases to the level of service enjoyed by our residents. The second key component of this strategy was to temporarily move the burden of transportation infrastructure and some capital equipment replacement to the Special Five Mill Fund and other special revenue funds where excess capacity was available. Since the Revenue Review projections were developed, County officials have cautioned City staff to expect a decrease in property tax revenues. Although this has a minimal impact on the General Fund due to the diverse nature of our overall revenue structure, the projected decrease limits the future ability of the Special Five Mill Tax to service the debt level previously proposed. While uncertainty about future property tax revenues delayed the planned 2011 Five Mill, this new information requires a significantly reduced scope of projects for the proposed Five Mill referendum (planned for voter consideration in January, 2012). This has also accelerated the need to return major capital investment to the General Fund. Fortunately, this is made possible by the Council's approval of the additional 1% in sales taxes. The proposed capital budgets for FY2012 include expenditure adjustments for investments in the following items.

- \$1,225,000 to replace aged capital equipment in General Fund departments; this
  amount includes a custom fire pumper truck, 10 Police patrol cars, and equipment to
  maintain our transportation and drainage infrastructure.
- \$350,000 in additional capital subsidy will be provided to the Solid Waste Management enterprise fund in order to expedite the acquisition of needed capital equipment. By granting these funds as subsidy, the City hopes to mitigate the need for future rate increases.
- \$3,016,000 from the General Fund in infrastructure reconstruction and maintenance; of this amount, \$1,896,000 will be dedicated to road resurfacing and restriping and will additionally leverage \$1,184,000 in federal funds to provide \$3,080,000 in road reconstruction in FY2012. \$1,000,000 will tasked towards various projects along Opelika Road as part of the proposed revitalization efforts.
- The 2012 Special Five Mill referendum will include \$3,250,000 for the construction of a new Senior Center and the expansion and exterior renovations at the Frank Brown Recreation Center. This project, which will completely transform the entire property

as envisioned by the long-term master plan, has been the highest priority for the Parks and Recreation Advisory Board for several years. While there will be some additional operating costs upon the completion of construction, no additional personnel will be required and most programming will shift from existing facilities.

 The Five Mill proposal will also include \$750,000 to fund improvements to our downtown parking facilities. Identified by residents as a high-priority in the Citizen Survey, these projects will add vehicle capacity and significantly improve efficiencies and aesthetics throughout the downtown area. Accompanying this document is a proposal for the 2012 Special Five Mill referendum.

In addition to the projects described above, the funding of several other major capital projects is included in the long-term projections, including the replacement of Moores Mill Bridge at I-85, and major road reconstruction and intersection improvement projects. The Capital Improvement Plan (included in this document) has been revised to show the projects the City will be able to fund using proceeds from the sales tax rate adjustment as both pay-as-you-go and through the issuance of general obligation debt. The regular replacement of capital equipment is also projected to occur at approximately \$750,000 annually. As this replacement occurs, it is anticipated that costs associated with the repair of an aged fleet and equipment downtime will significantly decrease.

#### On the Horizon

While the current budget adjustment proposal meets the immediate needs of the school system, there are longer term considerations that have yet to be determined. In the coming months, staff from the City's Planning and Finance departments and the Office of the City Manager will be working closely with staff from Auburn City Schools to develop detailed projections for their future capital and operating needs. The current projection includes funding for the schools under the current appropriation formula, plus \$2.5 million in supplemental funding; however, this projection is based on an incomplete assessment of their long-term fiscal needs. Once their needs have been fully identified and vetted, staff can move forward with a plan for providing the necessary resources to meet those needs. As mentioned above, I anticipate a more robust discussion of the long-term objectives of the school system in the next 12 months.

Less critical, but nonetheless significant, is the potential for major improvements along Opelika Road. Council has indicated a strong desire to revitalize this important corridor, and earlier this year you were presented details of an incentive program developed by our Economic Development and Planning staff. The other major component to the long-term revitalization of Opelika Road will be improvements to the public right-of-way, to include pedestrian, signage/signalization, drainage and roadway improvements. Both the proposed budget and future projections include \$1.0 million in annual funding for this initiative. We look forward to fully developing this plan and beginning to bring forward project recommendations in the near future.

#### Conclusion

As stated at the beginning of this message, the Mid-Biennium process does not create a new budget, but affords an opportunity for the existing budget to be adjusted to reflect recent realities and adapt to any change in priorities or objectives. We are fortunate to have a citizenry and governing body that has been steadfast in their priorities, making the current adjustments a relatively straightforward process. The adjustments presented in this document for consideration represent a continuation of the current strategy built upon fiscal responsibility and financial conservatism. This pragmatic approach has served us well during the recent national and global economic uncertainty, and the continued commitment to operating a fiscally sound local government allows the City of Auburn to continue to move forward in providing quality public services at a level commensurate with the demands of our residents.

Sincerely,

Charles M. Duggan, Jr.

Charles M. Duggan Jr.

City Manager

#### General Fund (Fund 100 only) - Overview of Changes in Fund Balance

The City Council's approach to determining the level of fund balance to be maintained in the City's General Fund is two-fold: 1) a strong budget administration and monitoring process that enables a timely management response to changing economic conditions; and 2) commitment to a taxation level that will support the provision of services and facilities, as well as provide a modest reserve. Management strives to maintain a fund balance that is 20-25% of expenditures. In 2001, the Council created a Permanent Reserve, to be used only in times of natural disaster or significant, unexpected economic stress. Maintaining strong reserves is a strategy that has worked well over the years. In the 1990s, this approach sustained the City during recovery from hurricanes and is helping to mitigate the effects of the current recession.

#### Total Special Activities of the General Fund - Overview of Changes in Fund Balances

**Special Activities of the General Fund** are used to provide a separate accounting for insurance-related services that are provided by the City to all City departments, as well as to the Auburn Water Works Board.

**Liability Risk Retention Sub-Fund** accounts for the costs of operating the City's general liability and workers' compensation self-insurance program and funding self-insured retentions for other liability exposures.

**Employee Benefit Self-Insurance Sub-Fund** accounts for the cost of operating the City's self-insured employee health benefits program.

#### Total Special Revenue Funds - Overview of Changes in Fund Balances

**Special revenue funds** are operating funds used to account for the proceeds of specific revenue sources that are legally restricted to be spent for specific purposes. Generally accepted accounting principles require these separate Special Revenue Funds, which demonstrate compliance with the legal restrictions on the use of these revenues. The City of Auburn budgets for the following special revenue funds:

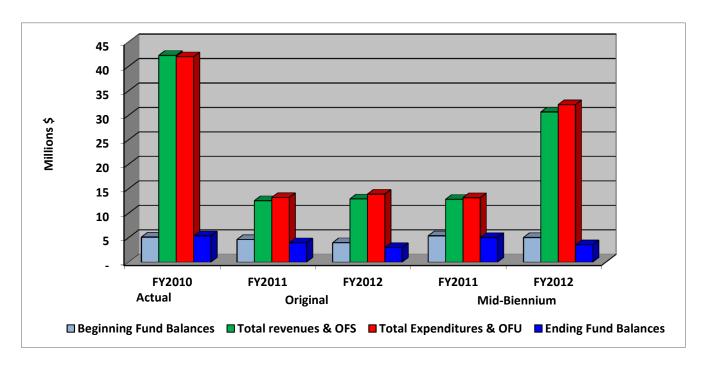

Seven Cent State Gas Tax Fund accounts for funds received from the State of Alabama and disbursed for street-related projects.

Nine Cent State Gas Tax Fund accounts for Auburn's share of the State of Alabama four cent and five cent gas tax revenues which is disbursed for the resurfacing and restoration of roads, bridges, and streets.

**Special School Tax Fund** accounts for eleven mill ad valorem tax revenues used to pay principal and interest on bonds issued for school purposes and five mill ad valorem tax revenues used in furtherance of public education.

**Public Safety Substance Abuse Prevention Fund** accounts for funds received from the U.S. Marshall used for enforcement of laws against drug trafficking.

### Sewer Fund - Overview of Changes in Net Assets

**Enterprise funds** are funds used to account for operations that are financed and operated in a manner similar to private business enterprises. The intent is that the cost, including depreciation, of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

Sewer Operating Fund accounts for revenues earned from and costs related to the provision of sewer service.

<sup>\*</sup>Conditional capital outlay is budgeted, but it is conditional based on the City Manager's and Finance Director's review of actual revenues compared to the budgeted.

#### Capital Improvement Plan by Funding Source

#### **Fiscal Years 2011-2016**

The City of Auburn maintains a Capital Improvement Plan (CIP) which covers a six-year, or 3 biennia, period. This plan details both the timing and funding sources of various capital infrastructure needs of the City, as determined by the City's management team and professional engineering staff, and is reflective of the priorities of City Council and residents. Through annual updating and continual monitoring of infrastructure conditions, funding status and a changing urban environment, the CIP is a flexible tool for developing an attractive built-environment, while realizing the constraints imposed by limited resources.

The table below offers a summary of funding capacity from a number of sources, and is organized by year. Projects are grouped into category by type and the funding source available is identified by the color-coding in the table below. Only projects with an identified funding source appear in the first biennium, with the exception of those projects of low to medium priority which are funded conditionally based on sufficient revenues to the General Fund. The last four years represent a reasonable assumption of available funding, both from internal and external sources.

Funding Source	FY2011	FY2012	FY2013	FY2014	FY2015	FY2016	Total
General Fund	112,662	3,441,000	2,957,000	3,478,334	2,893,000	3,070,000	15,951,996
